Sequence 14, Application US/08470426B

Patent No. 5856458
GENERAL INFORMATION:
APPLICANT: Okamoto, Hiroaki
APPLICANT: OLGONUCLEOTIDE PRIMERS, AND THEIR
TITLE OF INVENTION: APPLICATION FOR HIGH-FIDELITY DETECTION OF NON-B
TITLE OF INVENTION: HEPATITIS VIRUS
NUMBER OF SEQUENCES: 33
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                              506 IGCCCGGTIGCICTIICTCIAICTICCICTIGGCTITIGCTGICCTGTITGACCAICCCAG 565

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 30, Application US/09201912
Patent No. 6210962
GENERAL INFORMATION:
APPLICANT: Brechot, Christian
APPLICANT: Kremsdorf, Dina
APPLICANT: Forchon, Colette
TITLE OF INVENTION: Nucleotide and Peptide Sequences of a
TITLE OF INVENTION: Hepatitis C virus Isolate, Diagnostic and Therapeutic
TITLE OF SEQUENCES: 46
